once gave us the wrong schematic, so we coded our lab wrong, maybe if they had reference solutions, it would prevent this

She encourages students to ask questions, however, she could improve on answering the student's questions more precisely (i.e. the TA might be giving answers that have no relevance to what the student asked). It would be helpful to answer with an emphasis on explaining a concept or how the code/verilog works instead of reiterating instructions on the lab, as usually or simulating students have read the lab multiple times before doing it.
