

Group Registration Form

ECE532S Digital Systems Design

1 Board Information

All groups will use the Xilinx XUP Virtex II Pro development board. More information about the board can be found at <http://www.eecg.toronto.edu/~pc/courses/edk/>

Give a short description of what you are thinking about for your project in the space below. You will not be held to this idea. It only gets you thinking and gives us an idea of what might be needed.

1. Do you want to run Linux on the microprocessor in your design? Circle one: yes no
2. The TAs will have the lab open for everyone from 12pm-6pm to provide better service. However, you will be required to meet with the TA responsible for your project when that TA will be in the lab. Please indicate your ranked preference (1,2,3) or if your group is not available (X) during the following time periods:
12pm-2:00pm ____ 2:00pm-4:00pm ____ 4:00pm-6pm ____

2 Getting Your Board

You must bring your own boards to the lab.

Please form groups as soon as possible and show this form to a TA to get your group number. Then take this initialed form to get your board.

You may pick up your board from Fred in BA3104 or Norm in BA3110. They are usually closed 12-1 for lunch and leave at 4pm.

One of the group will be recorded as responsible for the board. You will need to provide the Name, Student Number, and email address for that person. If, for example, that person leaves the group, then **the designated person is still responsible until Fred or Norm are given updated information.**

3 Group Members and Design Tools Sign Out

This section is to ensure that you understand the conditions for use of the software.

The software provided to you in this course is for course work only. The software is for your own use and not to be redistributed. You will be provided with two DVDs with the tools distribution and a service pack. The install key will be given out when this form is received. Any violations will be considered an academic offense.

All members of the group must sign below and agree to these conditions before the group will be given the install key.

Member 1:

Print Name: _____ Student Number: _____

Signature: _____ Date: _____

Email address: _____

Member 2:

Print Name: _____ Student Number: _____

Signature: _____ Date: _____

Email address: _____

Member 3:

Print Name: _____ Student Number: _____
